

You could have the
duplex, Single
specimens, I don't say
could be made out.

Very truly yours

Asabany

HERBARIUM OF HARVARD UNIVERSITY,
BOTANIC GARDEN, CAMBRIDGE, MASS.

18 Jan

1876

Dear Mr. Davenport

The collection you
ask after has not
yet been yet.

That of Louis Cali-
fornia is here, undis-
tributed

Mr. Watson, who
has them in charge —
is some day to print

them into sets I
sell for Palmer's
benefit.

He will do all he
can for you.

But if you want
to run off with
a good part of the
Horns, what would
the subscribers say
to missing them in
their sets?

But if there is enough
to make out the requisite
no. of sets - (12 or 15).
